Hi Dan,

Sorry for the late response; Jen Colaizzi's last day here was Friday, and I've been on vacation.

So let me first double check that nobody already got back to you? And second, can you give me some more info on what you'd like to cover? We may not have bandwidth until after tomorrow's hearing, but I'll do my best to find someone for you.

Christie

Hey Jennifer and Christie,

Is someone who works on EPA Superfund available to talk with Ali and I at some point early next week say Tuesday afternoon or Wednesday?

We're still working on our Superfund story and have some basic questions about the program

(along the lines of what we've already asked but in more detail I think).

Many thanks,

Dan

Hey Dan,

I'm out today but forwarded your question to the PIO today, Jen Colaizzi, who is also cc'd here.

Hey Christie,

Have a quick question. Does EPA know how many ongoing Superfund cleanups involve old mining or smelting sites (or just generally, mining related sites, if that's easier... so long as it includes smelting sites)?

Many thanks!

Dan

I don't know how it's 3:30. I'm so sorry for the delay. Responses in red are below.

Dan Frosch:

1. The tax on polluters that fed the Superfund Trust Fund expired in 1995, correct? Correct

2. And the balance of that fund, according your numbers, dropped to \$0 in FY 2003, correct? Correct

Alexandra Berzon:

Following 2004/2005ish studies showing water quality was worsening, EPA began weighing a Superfund designation, sending a preliminary letter around two years ago to Kinross Gold Corp., a large Canadian mining company that now owns the Sunnyside mine (among other moves). We sent information request letters to Kinross Gold Corporation, Sunnyside Gold Corporation and Mueller Industries Inc. in January 2013.
